PROJECTS

Kv prishtina Jr Website

- Developed a full-stack web application for Kv Prishtina Junior using **Next.js**, **React**, and **Tailwind CSS**, delivering a sleek, responsive user interface
- Launched a high-performance web application for Kv Prishtina Junior utilizing Next.js, React, and Tailwind CSS; personally resolved 50+ bugs and user-reported issues to ensure platform stability.
- Engineered a custom **match scheduling and result tracking system** backed by a robust **PostgreSQL** database
- Utilized **TypeScript** across the codebase to ensure type safety, maintainability, and scalability
- Integrated **Google Cloud APIs** for youtube live to show on the website, content delivery, and seamless third-party service interaction
- Employed **Next.js server-side rendering (SSR)** and optimization techniques to improve load times and search engine visibility
- Designed and implemented mobile-friendly layouts and components to ensure an optimal user experience across all devices

Invoiceify
April 2025 - present

- Built a fully self-hosted open-source invoicing platform using Next.js, TypeScript, and Tailwind CSS, enabling users to deploy the system on their own websites for free
- Developed seamless Stripe API integration for handling real-time invoice payments with full checkout and webhook support
- Implemented a secure backend with middleware-based request validation, IP-based firewall protection, and session management
- Utilized Neon (PostgreSQL) as the primary cloud database for reliable and scalable data persistence
- Configured SMTP email services for automated invoice delivery, payment confirmations, and user notifications
- Architected the system with modular and reusable components for ease of setup, deployment, and maintenance
- Employed server-side rendering (SSR) and API route handlers via Next.js to optimize performance.
- Ensured full cross-device compatibility with responsive, mobile-friendly UI design and dark/light theme support
